

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1-41. (Cancelled)

42. (Previously Presented) A glove comprising elastomeric material wherein said glove has an inner skin-contacting surface and an outer surface comprised of said elastomeric material, wherein said elastomeric material comprises a polymer selected from the group consisting of natural rubber latex, synthetic polyisoprene, nitrile, and blends thereof, and wherein said outer surface is coated with a composition consisting essentially of a mixture of silicone, ammonium salts of alkyl phosphates, and cetyl pyridinium chloride.

43. (Previously Presented) A glove according to claim 42, wherein the glove is powder free.

44. (Previously Presented) A glove according to claim 43, wherein the elastomeric material is a natural rubber latex.

45. (Previously Presented) A glove according to claim 43, wherein the elastomeric material is polyisoprene.

46. (Previously Presented) A glove according to claim 43, wherein the elastomeric material is nitrile.

47. (Previously Presented) A glove according to claim 43, wherein the elastomeric material is a blend of two or more polymers selected from the group consisting of natural rubber latex, synthetic polyisoprene, and nitrile.

48. (Previously Presented) A glove according to claim 42, wherein the silicone comprises polydimethylsiloxane.

49. (Previously Presented) A glove according to claim 42, wherein the glove has a reduced coefficient of friction compared to the same glove without said outer surface coating composition.

50. (Previously Presented) A glove according to claim 42, wherein said coated outer surface of the glove has a coefficient of friction less than about 0.4.

51. (Previously Presented) A glove according to claim 42, wherein the glove has reduced stickiness when compared to the same glove without said outer coating composition.
